Project Title: Pokemon Platinum Guide Website

Pokemon Platinum(2008) is a very popular game from our generation(1999-2004), so I want to make a website for a familiar game that many people may have played but not completed. I'd like to build one long page with a possibility for multiple pages. This website wil focus more on how to effectively complete the game, as the final boss "Cynthia" is notorious for being difficult to beat, ranking Pokemon Platinum as top 3 in difficulty within the Pokemon Nintendo games. This website has alot of potential for content because pokemon is a "freeworld" game that allows alot of customization in how the game is played, with 210 different Pokemon to choose from for the default 6-man team.

Homepage/Introduction
-introduce pokemon platinum
-explain the website will serve as a pseudo-guide, assist with the difficult parts of the game

Difficulties/Obstacles
-list all the obstacles from the original 8 gym leaders, Cyrus/Team Galactic, elite 4, Champion Cynthia
-list some of the minor obstacles like rival Barry and random encounters

Choosing Team
-introduce the idea of balanced team for pokemon platinum based on obstacles
-give options for viables pokemon

Playing Game
-explain how to use selected team to complete obstacles
